MEETING MINUTES

GENERAL MEETING—MARCH 18, 1999

Meeting Called to Order—Tom McCreary, the Sacramento Chapter Marketing Representative, called the meeting to order in the absence of Samantha Thomas (President) and Bill Roberts (Vice President). Tom introduced himself to the attendees and he also introduced the other two chapter

officers who were present (Jeff Lung—Recording Secretary and Tom Krummell—Treasurer).

Half-Day Seminar—Tom announced the upcoming half-day seminar on April 13, from 8:30A.M. to 12:00P.M., at the Sacramento Hyatt Regency. The ISSA Sacramento Chapter and the Cylink Corporation will jointly sponsor the seminar.

Chapter Web Site—Tom reminded attendees to check the Sacramento Chapter web site for upcoming events and chapter news.

Membership—Tom encouraged attendees who were not members to sign up and join the chapter.

Annual Conference—Tom talked about the annual chapter conference in November. He encouraged attendees to provide the names of vendors they are interested in having at the conference as well as subjects in which they are interested. Requests may be sent via e-mail to any of the officers listed in the Sacramento Chapter Newsletter.

ISSA MEETING

May 20, 1999

1:30PM–3:00PM

Teale Data Center

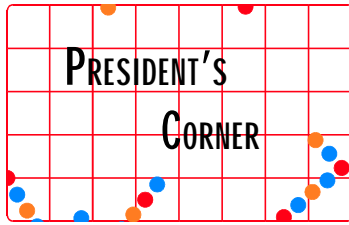

Isbell Conference Room

See Page 4 for general meeting information.

SECURITY ISSUES SURROUNDING E-MAIL AND THE WEB

WorldTalk's own Scott Turner will provide us with a presentation regarding the concerns and issues surrounding the use of e-mail and the web. He will share with us some of the risks created when companies do not secure their e-mail and web environments. Scott will also share information about the importance of enforcing e-mail and web policies.

See Page 3 for speaker bio.

Thanks to all for participating in our March Meeting. Finjan did a great job with their presentation. A special thanks to Tom McCreary, Marketing Representative, for facilitating.

Annual ISSA Meeting: March 13–17. The new International Board of Directors and Chapter Presidents had great things to discuss, many decisions were made, and various items put in motion. A productive time had by all.

New ideas like discounts on software, free giveaways, free memberships, discounts on travel, discounts on more conferences, partnerships with other organizations, web site assistance, membership retention plans, and others programs are either already in place or are being finalized. What an advantage to be an ISSA member! Check out your new interna-

SECURING ELECTRONIC COMMERCE

San Francisco ISSA Conference

- 🔒 Anatomy of Secure Electronic Business
- 🔒 Risk Assessment for a Secure EC Gateway
- 🔒 Securing the Internet Age
- 🔒 Public Key Infrastructure (PKI) Technology
- 🔒 Secure Data Exchange (SDX)
- 🔒 Securing the Enterprise
- 🔒 Building an E-Commerce Architecture for Now and the Future

Registration: \$175

For more information, contact Zeny Zabala at zeny.zabala@clorox.com

tional web site near the end of May at www.issa.org.

Our April 13, 1999, 8:30–12:00, ISSA/Cylink presentation was great! One of the best presentations on digital signatures, encryption, and IA&A (identification, authentication, and authorization) I have ever heard. If you missed it, well, you really missed it. If you would like a soft copy of the presentation, send me an e-mail message. Note: You will need Project 98. Thanks again Cylink! We look forward to our future ISSA/Cylink successes!

We will be having a very productive Board of Director's meeting directly after our May 20 general assembly meeting. Please feel free to join us. See you then!

THANK YOU!

Bill Dwyer has offered to work with Vice President Bill Roberts on a Membership Development Program. Thanks Bill D!! We look forward to the exciting ideas!

MARK YOUR CALENDAR

You "MAY" already be a winner!

Mark your calendar for Thursday, MAY 20, 1999, at 1:30. The Teale Data Center is located off of Arden Way, west of Business 80, on the corner of Royal Oaks and Evergreen.

CHECK OUT OUR WEB SITE!

Don't forget to check out our web site at www.issa-sac.org. If you have ideas or would like to work on our web site, please contact Carolyn Smith at ms_smith@msn.com.

VOLUNTEERS NEEDED

We are looking for a few members to assist in planning our annual conference this year. Items of specific interest are securing top industry leaders/speakers and brief abstracts of their presentations. Possibilities include Thursday, November 4, again at the Sacramento Downtown Hyatt. If you have ideas, questions, or would like to assist, please contact Tom McCreary at mccreary@pacbell.net or (916) 987-1800. We need top quality speakers...

MINUTES *Continued from Page 1...*

Security Projects—Tom then asked the group at large if any one was working on any interesting security projects. Various individuals in attendance discussed the projects they were working on.

Presentation—Tom introduced the guest speaker, Michael Jue, from the Finjan Corporation. The Finjan Corporation is one of the industry leaders in "mobile code" security. Mobile code includes: Java, ActiveX, JavaScript and Visual Basic Script. Michael provided a very enlightened presentation on mobile code security risks and how his company helps address these risks.

Meeting Adjourned—After the presentation Tom adjourned the meeting.

BOARD MEETING—MARCH 18, 1999

No Board meeting was held.

BOARD MEETING

May 20, 1999
3:00–4:00P.M.

(follows General meeting)

EMPLOYMENT OPPORTUNITY

Senior Systems Security Analyst

Recruiter: Jim Chamberlin, Phone: 916-858-8827
Location: Rancho Cordova

Essential Job Functions:

- ☞ Implementing and administrating an Information Security Program.
- ☞ Working with members of other technical support groups to assure appropriate security is applied to new projects and applications.
- ☞ Determining, implementing and maintaining operating system security parameters.
- ☞ Consulting with network operations personnel to determine and apply system security requirements for O/S's, applications, and networking products.
- ☞ Coordinating and monitoring the activities of other groups on-site to ensure compliance to corporate security policy.
- ☞ Coordinating with outside sources such as BBS's, chat lines, hacker DL's, and vendors to ensure that all threats to the environment are known and acted upon.
- ☞ Monitoring system activities to identify potential security breaches.

- ☞ Performing security audits on a routine and periodic basis.
- ☞ Training employees in security policy and procedures.

Skills and Abilities:

- ☞ Working knowledge of Microsoft operating systems and applications software such as e-mail, browsers, file encryption, and NT domain administration.
- ☞ Solaris O/S and applications.
- ☞ Firewall, router, remote access, SecurID, TACACS, Cisco IOS
- ☞ Automated security products designed to monitor and test operating systems and scan for network vulnerabilities.
- ☞ Strong attention to detail and accuracy.

Minimum Requirements:

- ☞ 4-6 years' progressively responsible experience in systems administration and/or computer security in a customer service environment.

Desirable Background:

- ☞ An ability to work independently and with others in every department, and at all levels of authority within the organization.
- ☞ Strong verbal and written communication skills. BS or BA is a plus.
- ☞ Working knowledge of DNS, http, https, and basic UNIX and NT.
- ☞ Manages time effectively and according to priorities.

SPEAKER BIO

Scott Turner, West Coast Account Manager, has been with WorldTalk since early 1998. Prior to this position Scott held post at a little company called Netscape.

About Worldtalk: Established in March 1992, Worldtalk Corporation is a leading provider of content security and policy management solutions. The company's WorldSecure policy management platform

enables organizations to define and manage Internet e-mail, web security, usage policies, ensure confidentiality of external e-mail communications, protect intellectual property, and prevent SPAM and viruses. Others have utilized WorldSecure to ensure compliance with key government regulations governing e-mail usage.

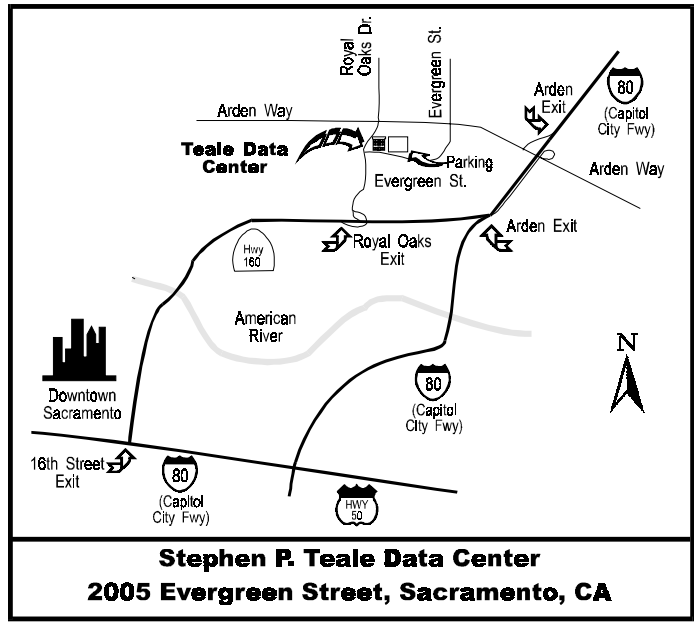

An interesting note: In November 1996, Worldtalk acquired Deming Internet Security, a leader in encryption technology, and coauthor of the S/MIME RFC. This allowed the company to accelerate its expansion into messaging and Web security products, such as WorldSecure Server and WorldSecure/Web.

ISSA meetings are held the third Thursday of every other month from 1:30P.M.–3:00P.M. at Teale Data Center in the Isbell Conference Room. Free parking is available in the lot. See map at right.

1999 ISSA meeting dates:

- Thursday** **May 20, 1999**
- Thursday July 15, 1999
- Thursday September 16, 1999
- No November meeting due to annual chapter seminar*
